Facade Tectonics Institute Announces 2026 College of Fellows

Sixteen honorees recognized for significant and lasting contributions to the art, science, and practice of facade technology.

LONG BEACH, CA, October 27, 2026 — The **Facade Tectonics Institute (FTI)** announces the election of sixteen individuals to its **2026 College of Fellows**, one of the Institute's highest honors. Selected from approximately 50 nominees, the new Fellows were honored during an induction ceremony at **FTI's 2026 World Congress on October 1, 2026, in Pittsburgh, Pennsylvania.**

Fellowship recognizes exceptional individual achievement and significant, lasting contributions to facade technology, the profession, academia, and the Institute. This year's honorees represent a broad range of expertise across facade design, engineering, fabrication, construction, and education.

Meet the 2026 College of Fellows

- **Peter Arbour** | Liquid Wall

Glass Association of North
America

Erik Verboon
Director and co-founder of
Walter P Moore

Founded in 2016, the College of Fellows comprises Institute members elected to Fellowship by a jury of their peers. The honor celebrates those whose work has advanced the field and made meaningful contributions to architecture and the Institute. Fellowship is honorary and includes complimentary lifetime FTI membership.

The College of Fellows provides a forum for exchanging ideas, advancing FTI's mission, and promoting excellence in facade design. Through knowledge sharing and mentorship, Fellows serve as a resource for the Institute and help prepare the next generation of facade innovators.

FTI congratulates the new Fellows and honors the enduring contributions of its posthumous inductees. Together, their achievements reflect the depth of expertise and commitment that continue to advance the facade community.
