MARS IS NOT AN OPTION. OUR FUTURE IS HERE.

Join us at the frontline of survival and act now to build a Resilient Future for Humanity.

We need you: Act now to protect our future!

Our world is changing. Extreme heat, severe winter storms, hurricanes, wildfires, flooding, and other climate-related events are placing unprecedented demands on our built environment. When building services are disrupted or fail, the first and most important line of defense is the building envelope – the facade, windows, skylights, and glazing systems that protect the people inside.

High-performance building skins are no longer simply architectural features. They are essential infrastructure that improves resilience, reduces energy consumption, enhances occupant safety, and helps communities withstand increasingly challenging environmental conditions.

At the **Facade Tectonics Institute (FTI)**, architects, engineers, scientists, manufacturers, contractors, educators, and industry leaders work together to advance the technologies, standards, and best practices that shape the resilient buildings of tomorrow.

We need your support & involvement as key players in our industry.

Become a member. Make a donation. Share your expertise. Help us advance research, education, innovation, and collaboration that will improve the performance of buildings around the world. Together, we can create safer, healthier, more sustainable, and more resilient communities.

Together, let's protect the future - one building at a time.

Warm regards,

Attila Arian
President, Facade Tectonics Institute
Katerina Hojgrova
Executive Director, Facade Tectonics Institute
Dirk Schulte
Membership Ambassador, Facade Tectonics Institute

IMPACT

FTI's community spans the globe, with members in the United States, Canada, Mexico, Germany, France, Spain, the Netherlands, the United Kingdom, Australia, New Zealand, and more.

Bridging Academia and Industry

In 2026, FTI brought together students, PhD students, academics, firm owners, architects, engineers, manufacturers, general contractors, and more. Here's who took the stage:

400+ Peer Reviewed Papers

Research from FTI's World Congress proceedings and beyond, open to explore in our online database. A growing resource for practitioners, researchers, and students.

10+ Events Per Year

From the biennial World Congress to webinars, workshops, and tours, FTI keeps the facade community learning and connected all year.

AIA CE Providers

In 2026, FTI has have granted 49 AIA LU | HSW credits through different events and learning opportunities.

500+ Volunteer Hours

Industry experts peer review, moderate sessions, and serve on committees, keeping FTI's work rigorous and independent.

OUR PURPOSE

A better built environment

Realizing the potential of the building facade through innovation and collaboration.

Our Vision

We envision a future that fully realizes the potential of the building facade to create delightful, human-supportive, sustainable and resilient built environments.

Our Mission

We promote innovationinthe art, science and technology of the building facade in pursuit of accelerating change in the performance of built environments.

Your membership helps move this work forward

FTI brings design, engineering, construction, manufacturing, ownership and research into a shared conversation about facade performance. As a member, you can connect with peers, exchange knowledge and contribute your expertise.

Connect across disciplines
Learn from perspectives that complement your own.

Put knowledge into practice
Explore research and member opportunities that inform your work.

Help shape the conversation
Find the membership level that fits how you want to contribute.

Find your level. Supporter connects your firm to the community. Associate adds committee involvement. Executive adds opportunities to shape events and surveys. Partner adds leadership consideration and publication benefits.

CORPORATE MEMBERSHIP

Connect your firm to the field

For architects, developers, owners, contractors, engineers, manufacturers, real estate companies, and service providers.

Demonstrate your commitment to sustainable and resilient buildings and communities.

Connect with FTI's global network of industry leaders and innovators. Gain visibility through the Member Directory, stay informed with exclusive updates, and access technical insights and expertise from industry specialists, academic partners, and the College of Fellows.

Corporate Membership Levels & Benefits	Partner	Professional	Associate	Supporter
Annual fee	$10,000	$7,000	$4,000	$1,500
Exclusive access to FTI's Digital Knowledge Library and FTI's Events	10 users	7 users	4 users	2 users

Recognition and participation are subject to consideration; membership does not guarantee selection.

Committee participation, nominations and publication recognition are subject to the applicable selection or consideration process.

ACADEMIC | NONPROFIT | GOVERNMENT

Bring research into the conversation

Share our mission of research and education. For academic, nonprofit and government organizations.

$500 **Annual organizational membership**
Connect your work with the building industry

FTI supports collaborative research and knowledge sharing to help accelerate change in the built environment. This membership gives your organization a platform to exchange ideas and bring faculty, student, and institutional work into the facade dialogue.

Share your research
Opportunities for academic work to be recognized through FTI.

Connect with the community
Access to FTI's communications network and monthly membership newsletter.

Raise your visibility
A member directory profile, linked through SKINS, that helps readers learn about your organization and contact you.

Access member opportunities
First access and special pricing for events, publications, and other exclusive opportunities.

Recognize your membership
A signed, framed membership certificate acknowledging your membership start date and contributions to

INDIVIDUAL MEMBERSHIP

Invest in your knowledge

Mobilize your inner **Facade Geek** and help accelerate improvements in the performance of the built environment.

Every individual level includes access to FTI's searchable Digital Library of technical research papers and on-demand recordings, plus early access and special pricing for events, publications, and member opportunities.
